# Food Allergy & Anaphylaxis Action Plan

Name:

Date of Birth: \_\_\_\_\_

Provider: Allegro Pediatrics

Phone Number: (425) 827-4600

Allergens:

Weight: \_\_\_\_\_

**Asthma:** YES NO *If yes, higher risk for severe reaction.* 

## EXTREMELY ALLERGIC TO:

If checked, give epinephrine immediately if the allergen was LIKELY eaten, for ANY symptoms.

If checked, give epinephrine immediately if the allergen was DEFINITELY eaten, even if no symptoms are present.

**SEVERE SYMPTOMS** | If any severe symptoms are present, inject epinephrine immediately.

#### INJECT EPINEPHRINE IMMEDIATELY

- Note the time
- Call 911
  - Inform dispatcher the child/teen is having anaphylaxis and may need epinephrine when emergency responders arrive
- Consider additional medications:
  - Antihistamine
  - Inhaler if wheezing
- Stay with child/teen
  - $\circ$  Lay them flat, raise legs, and keep warm
  - If breathing is difficult or they are vomiting, lie them on their side
- If symptoms do not improve, or symptoms return, more doses of epinephrine can be given 5 minutes or more after the last dose
- Transport to Emergency Room

**MILD SYMPTOMS** | If one mild symptom is present, monitor the child/teen closely.

### MONITOR THE CHILD/TEEN

- Antihistamines may be given for comfort if your child is itchy
- Stay with the child/teen; alert emergency contacts
- Monitor closely for changes. If symptoms worsen, give epinephrine

### INJECT EPINEPHRINE

Follow protocol for severe symptoms

## MEDICATIONS/DOSES:
