What Does My AIRQ[®] Score Mean?

The AIRQ[®] is meant to help your health care providers talk with you about your asthma control. The AIRQ[®] does not diagnose asthma. Whatever your AIRQ[®] score (total **YES** answers), it is important for your health care team to discuss the number and answers to each of the questions with you. All patients with asthma, even those who may be well-controlled, can have an asthma attack. As asthma control worsens, the chance of an asthma attack increases.¹ Only your medical provider can decide how best to assess and treat your asthma.
