\_\_\_\_\_  
\_\_\_\_\_

**Follow-up Appt:** \_\_\_\_\_  
**Next Well Child Appt:** \_\_\_\_\_  
*(In 1 year or as advised by your Pediatrician)*

**Next Immunizations:**  
*Flu (annually), COVID (as eligible), finish HPV if not done*

## HELPFUL TIPS FOR THIS STAGE OF LIFE:

### Development

- All young adolescents face social and emotional challenges.
- The ability for impulse control and responsible decision making are still developing.
- Young teens often argue for the sake of arguing, jump to conclusions, appear self-centered, and constantly find fault in the adult's position. Take time to listen and try to find a way to peacefully respond before reacting. Role model and teach that conflicts can be resolved with nonviolence.
- Parents should not underestimate their ability to positively influence opinions and decisions.
- Provide clear boundaries, rules, and expectations. Include discussions about bedtime, homework, T.V., chores, cell phone, etc.
- Parents can help by modeling healthy lifestyle behaviors and having open conversations with their teen.
- Anxiety or depression/mood issues may impact academic, behavioral, and social functioning. Your pediatrician is available for consultation if you have concerns.

### Safety

- Discuss strategies for unsafe/uncomfortable situations (peer pressure, risk taking, etc). Consider an agreement that if your child is ever in a situation that makes them genuinely uncomfortable, they can call you any time to come to their aid, without blame or punishment.
- Encourage helmet use.
- Use protective gear for sports.
- Concussions can occur when your child has a head injury, collision, or fall. Symptoms vary and most kids do not lose consciousness. We can evaluate your child for concerns and give advice on safe return to play. When in doubt, sit it out.

### Safety (continued)

- Your child is still safest in the back seat of the car. The front seat is OK after age 13.
- Verify that smoke alarms are working properly and avoid smoke exposure.
- Remove/lock up guns.
- Lock away cigarettes, lighters, alcohol, marijuana, and vaping devices.
- Keep medicines out of reach.

### Digital Media Plan & Safety

- Establish rules for internet and phone use. Discuss digital respect when posting on social media or texting. Bedtime and mealtime should be electronic-free zones.
- Visit the AAP website to create a [Family Media Plan](#).
- Parents should monitor privacy settings in personal devices, apps, social media, virtual assistants, and wireless networks.
- Screen time for homework and projects can often be prolonged. Research proves that multitasking with homework will result in work errors, longer to complete work, and mental fatigue from rapid task switching.
- Do not tolerate cyber-bullying. Help your child block the offender and report cyber-bullying to the school principal and Internet Service Provider.
- Review with your child that it is never OK to give personal information online unless they have parental approval.

### Important Resources

- **Crisis Text Line:** Text "Hello" to 741741
- **Suicide and Crisis Lifeline:** 988
- **Poison Control Center:** (800) 222-1222

## Puberty

- Access to accurate and culturally appropriate information is essential for your child.
- Encourage your child to ask questions, and be ready to answer at a level appropriate to their understanding. Consider books and parent/child classes for additional help.
- Talk to your child about your family expectations regarding friendships, curfews, and dating.
- Encourage daily hygiene/bathing.

## Body Image

- Young teens typically demonstrate an enhanced sensitivity to appearance. Clothing, accessories and hairstyles are often used as a way to fit in with peers and express themselves.
- Be conscious about how you talk about food and appearances as concerns of body image, dieting and weight may arise.
- Try providing healthy foods at home and allowing your child to participate in food shopping or meal preparation. Find ways to support their healthy choices and efforts.
- Try to eat healthy family meals together at home.

## School

- Young teens often still need guidance with organization and setting priorities as academic expectations are rising.
- Academic struggles may be a sign of learning disabilities, attention deficits, stressors at home or school, substance use, or anxiety/depression. Consider discussing concerns with your child's teacher or health care provider.
- Showing interest in their school/schoolwork, and communicating with their teacher shows them you value their education and development.

## Health

- Encourage calcium/Vitamin D/iron intake and balanced nutrition. Avoid sugar sweetened beverages and snacks.
- Visit the dentist regularly. Use toothpaste with fluoride and encourage flossing.
- Encourage daily physical activity for the whole family. We recommend 60 minutes of exercise every day.
- A simple bedtime routine, proper sleep (preteens need 9-11 hours and teens need 8-10 hours) and daily breakfast help them reach their potential.

## Overseas Travel

If you will be traveling with your family overseas, talk with your doctor about travel questions, or you can request an online pre-travel health consultation through our [eTravel Clinic](#).

Acetaminophen (Tylenol) Dose Table				
May repeat every 4 hours.
